

PROGRAMMING INSTRUCTIONS #428

1. Locate the Program Connector near the Keyless Entry Module. The connector is a white plastic and has two terminals that is not plugged into anything.

Receiver Module Locations

- * DIAMANTE - near the glove box
- * ECLIPSE/MONTERO - behind the knee bolster on driver's side
- * GALANT - On blower motor, above the glove box.

2. Jumper the two program connector terminals with a suitable jumper wire. The system will respond by unlocking and then unlocking all the doors or chirping the horn.
3. Press the LOCK button on the first remote. All doors will lock and then unlock, or the horn will chirp, to verify the remote was accepted.
4. Repeat Step 3 if there is a second remote.
5. Remove the jumper from the connector before testing the remotes for function.
